

“By selling you the powerful and seamless convenience of voice assistants, Google and Amazon have slowly inched their way into being the central platform for all your data and the core engine for algorithmically streamlining your life”

“The Algorithm” newsletter Jan 2019, MIT Technology review

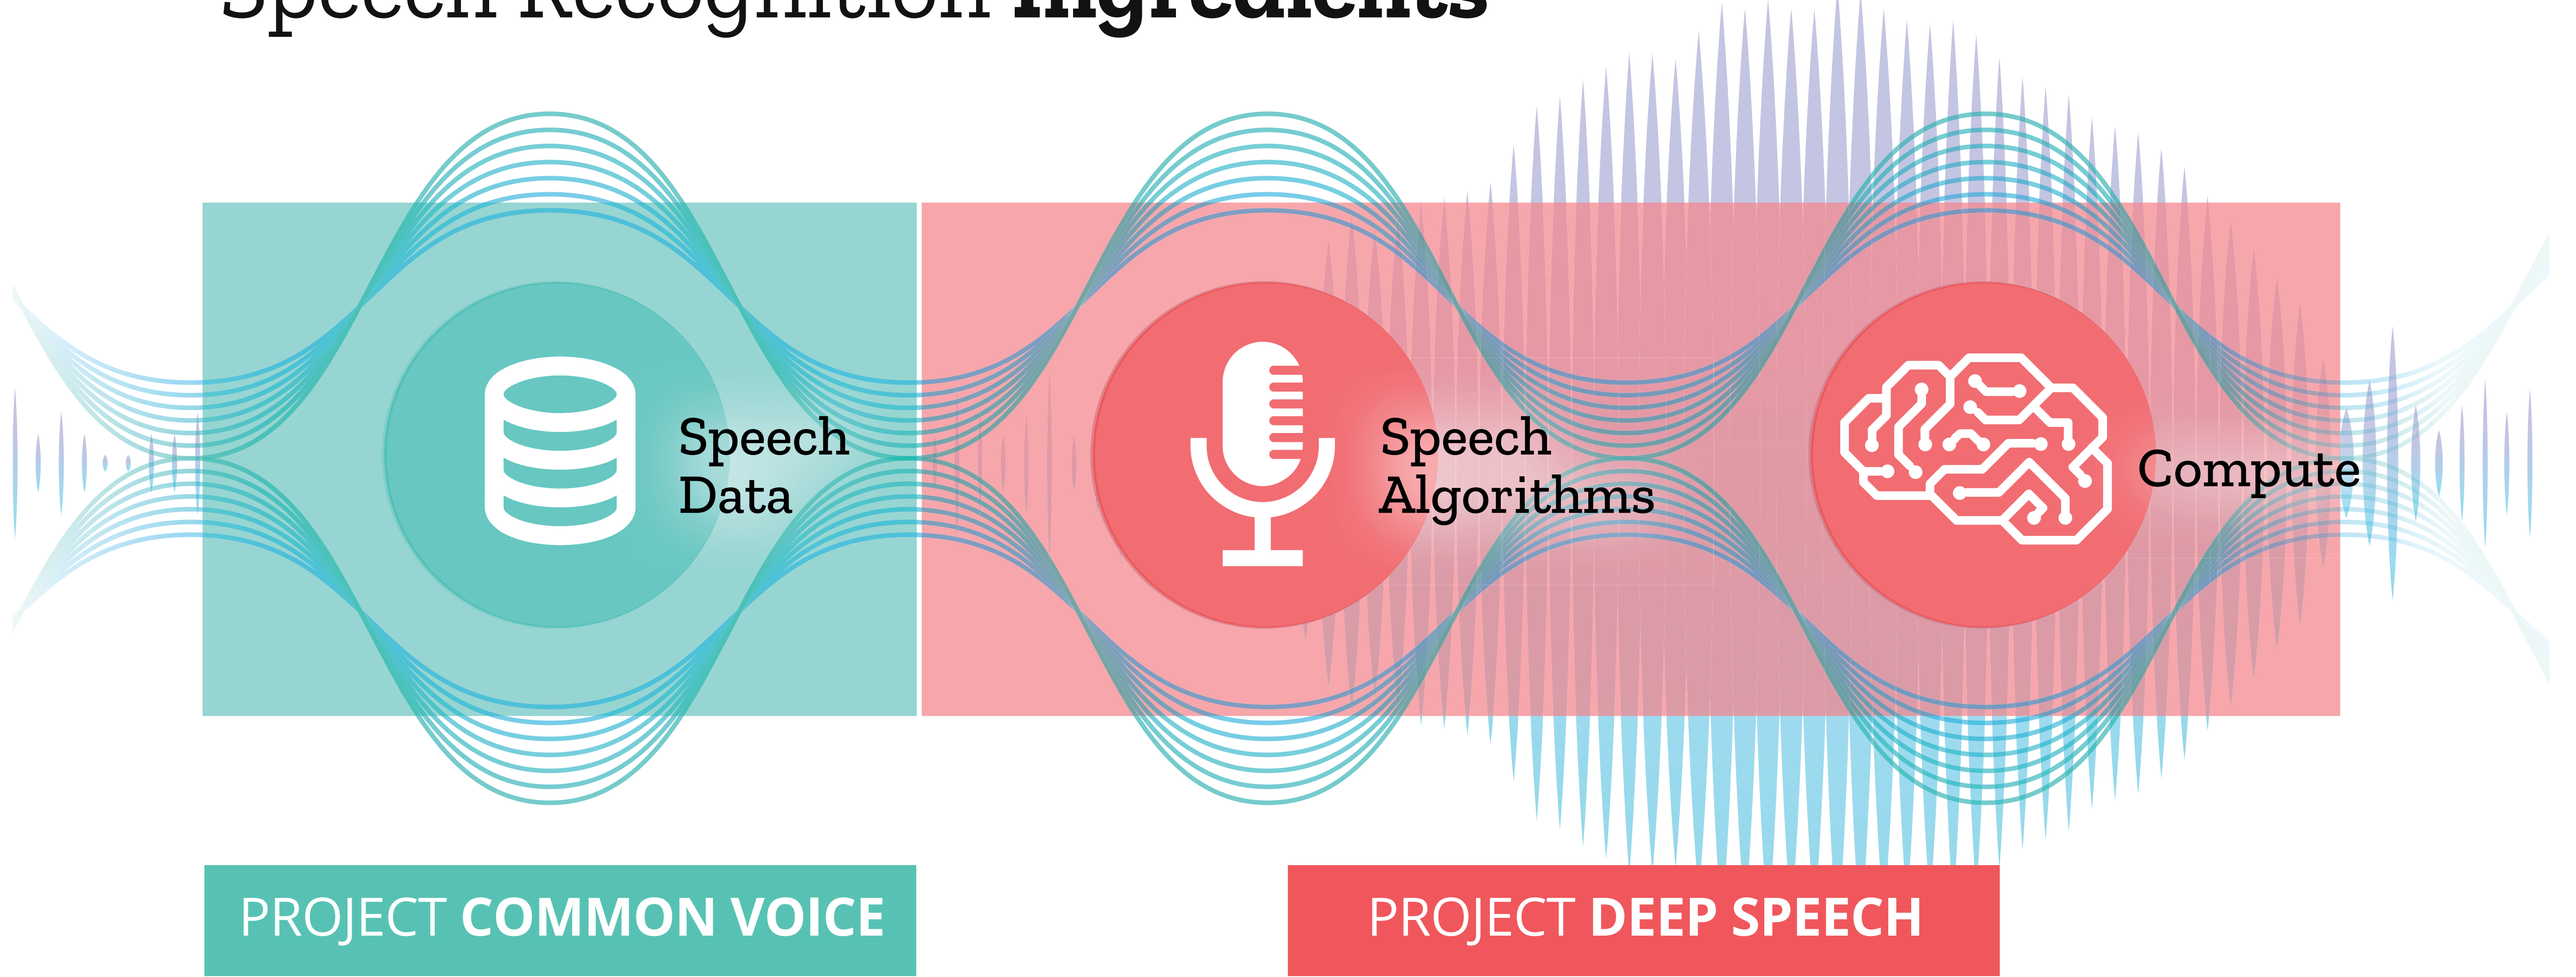

Common Voice

moz://a

Common Voice is a project to help make speech recognition open and accessible to everyone by building an open data set for all.

Speech Recognition **Ingredients**

Collected **2,400** of voice data in **7 HOURS**

29 **LANGUAGES** **70+** *in progress*

Over **200** developers helped to create the software

Contributions made by roughly **190,000** different people

Common Voice **Open Innovation**

- Open Ideation
- Expert Engagement
- Licensing
- Community Engagement
- Micro-task Crowdsourcing
